Intervention Study Presentation Guidelines (for May 23, 2012)

In addition to reading Chapter 11 from your textbook, please sign up to make a class presentation on one additional article. Please limit your presentation to about 15 minutes.

Please use whatever method you feel would be most useful for your presentation (PowerPoint slides, a summary 1-2 page handout, flip chart, or other). The presentation should address, at a minimum, the following questions:

1. What problems or issues motivated the attempt to change working conditions?
2. What methods were used to try and change working conditions?
3. Were the health effects of the change in working conditions evaluated?
4. Was the intervention successful?
